Self-tinting Glass™

Residence in Michigan, USA

Windows are your connection to the outdoors and protection from the elements. While environmental conditions can be unpredictable, your view and comfort should never be compromised.

Imagine windows that intuitively adapt throughout the day for you—
a standard offered exclusively by Suntuitive® glass.

Imagine functionality

Suntuitive glass is simple—it uses heat from sunlight to tint your windows when necessary. On days of intense sun, when you might have to pull a shade or blind with traditional windows, Suntuitive glass will gradually darken for you. This will balance the intensity of the light and all but eliminate the heat coming in through your windows, while preserving your view.

In the windows above there is one traditional window in between windows with Suntuitive glass. The Suntuitive glass has tinted to balance the brutal glare and heat that the traditional window is letting in.

- No maintenance
- Maximizes daylight
- Reduces interior glare
- Excellent R-factor and U-value
- Blocks solar heat
- Reduces noise
- You can *always* see out of your windows
- Easy installation
- Optimizes energy efficiency
- Can be used in new and replacement windows

Suntuitive glass offers comfort and peace of mind

With Suntuitive glass, there is no guessing. Gone are the days of sacrificing your view by closing the drapes to block intense sunlight. Gone are the days of constantly adjusting your thermostat. Suntuitive glass is efficient and continuously works for you to provide a comfortable and safe living environment.

Imagine unmatched security & protection

Laminated glass provides strong resistance from flying debris and home invasions. In addition, Suntuitive glass offers unparalleled fading protection by blocking 100% of all UV light as well as reducing other sources of fading that can damage items in your home including: photographs, artwork, furniture, carpet and wall coverings.

- Shields your home and family from damaging UV
- Impact & security tested
- Forced entry tested
- 10 year warranty

*Suntuitive glass is not privacy glass. There may be times when shades and blinds are appropriate.

Why Suntuitive Glass?
